- \* It may takes two seconds for page to fully loaded.

Feel free to add another Transaction!

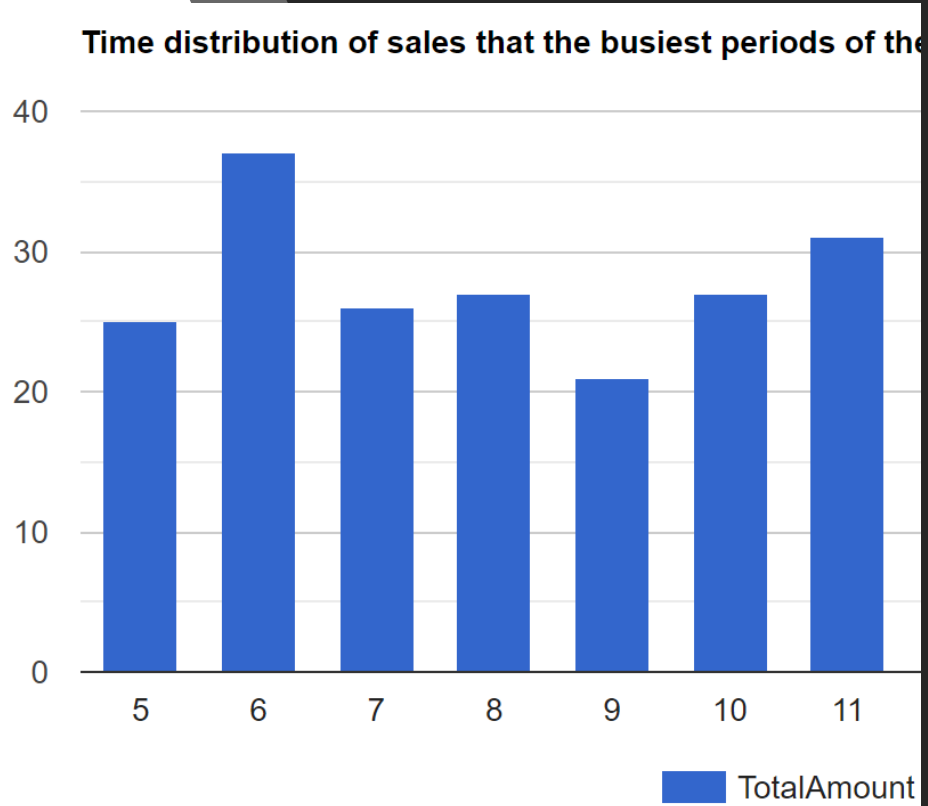

Input a Bill ID(Format: 0) 22315

Transaction\_ID 78268

Input Your SSN(xxx-xx-xx) 000-00-00

Select State	Select Bar	Select Item
<input type="text" value="Select State"/>	<input type="text" value="Select Bar"/>	<input type="text" value="Select Item"/>
Select Hour	Select Minute	Select Second
<input type="text" value="1"/>	<input type="text" value="00"/>	<input type="text" value="00"/>
Select Month	Select day	Year(yyyy) 2018
<input type="text" value="January"/>	<input type="text" value="01"/>	

# Bar Page - Graphs

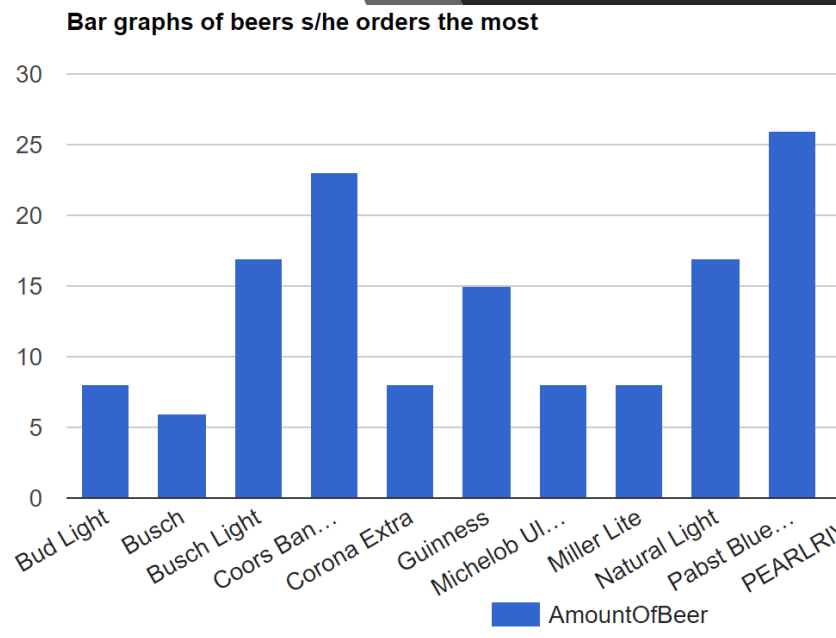

- Graphs in the Bar page includes following:
  - Top 10 Drinkers who spent most in a Bar
  - Top 10 popular beers in a Bar
  - Manufacturers who sold most beers in a Bar
  - Time distribution of sales in a day of the Bar
  - Time distribution of sales within a week of the Bar

(Just enter a Bar's License# in the Bar table)

# Drinker Page

- The drinker page includes following:

- Tables: Drinker Table, Bill Table, Transaction Table
- One's transactions Table ordered by time and grouped by different bars
- Graph of beers one ordered most.
- Graph of one's spending in different bars during different time period.

\* It may take a second for page to fully loaded.

# Beer Page

- The Beer page includes following:
  - Table: Beer Information Table.
- Graph of Bars who sell the most amount of the beer.
- Graph of Drinkers who purchased the beer more than others.
- Time distribution of when the beer sells most.

Bar graph of top bars where this beer sells the most.

Drinkers who are the biggest consumers of this beer.

## SQL QUERY INTERFACE

- On this page, there is a Relational Scheme which will give user some idea about our data base. Below the Relational Scheme is the box where user can input all SQL queries.

(To check ER diagram, just click Menu on the top right corner and then choose ER diagram.)

# FEEL FREE TO TEST OUR DATABASE

**Please type in your query here**

Please follow the SQL rules, you can get from the below link  
Click me [--](#).

To type query and hit enter

Submit

# Modification Page

## Update BAR Table

field1 = new-value1, field2 = new-value2 [WHERE Clause];

UPDATE

## Update BILL Table

field1 = new-value1, field2 = new-value2 [WHERE Clause];

UPDATE

## Update DRINKER Table

field1 = new-value1, field2 = new-value2 [WHERE Clause];

UPDATE

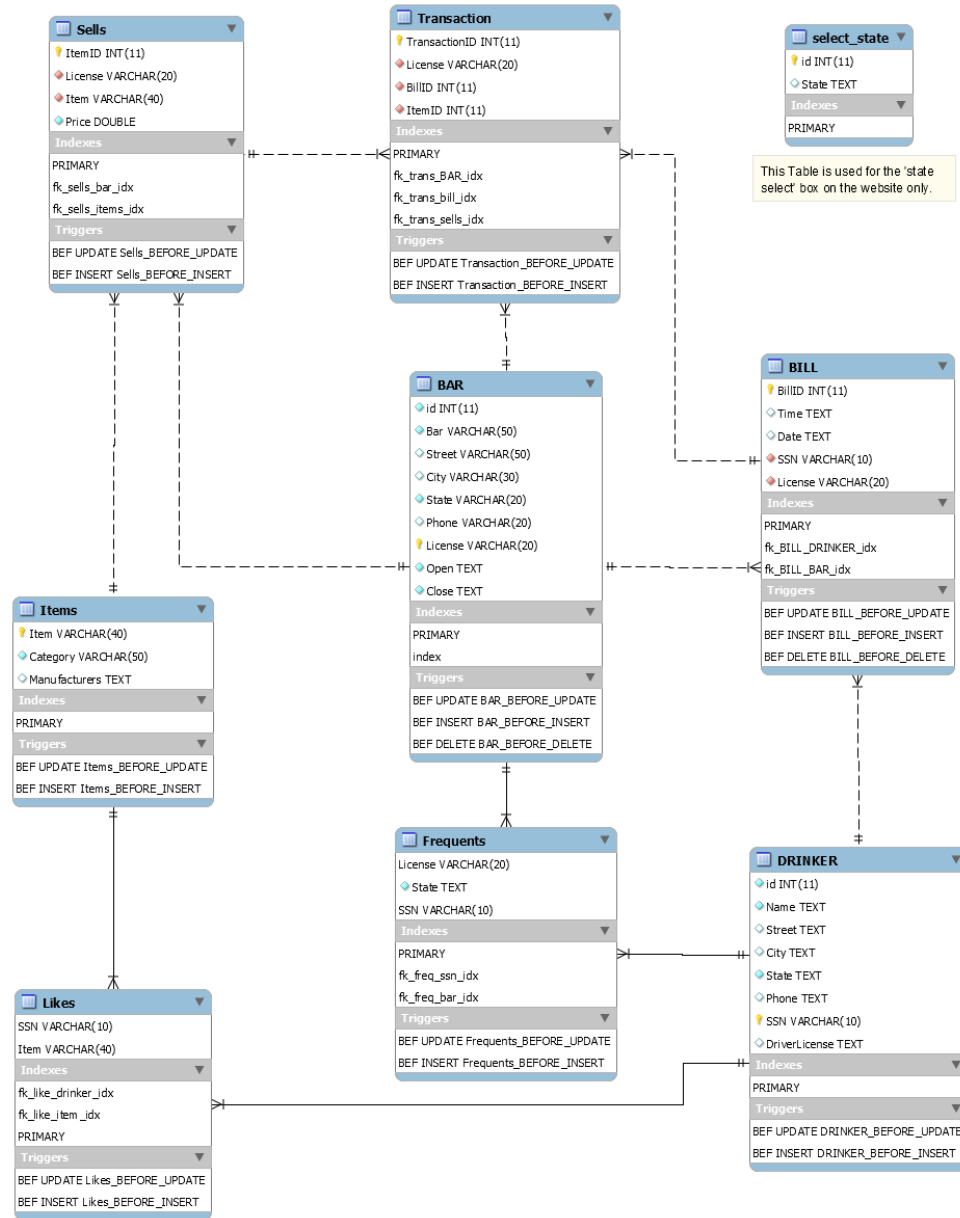

- In this page, user can modify all the tables “freely”. Those queries that against the “rules” will not be add to the database due the triggers set in those tables.

(There is a Relational Scheme on top of page for reference. )

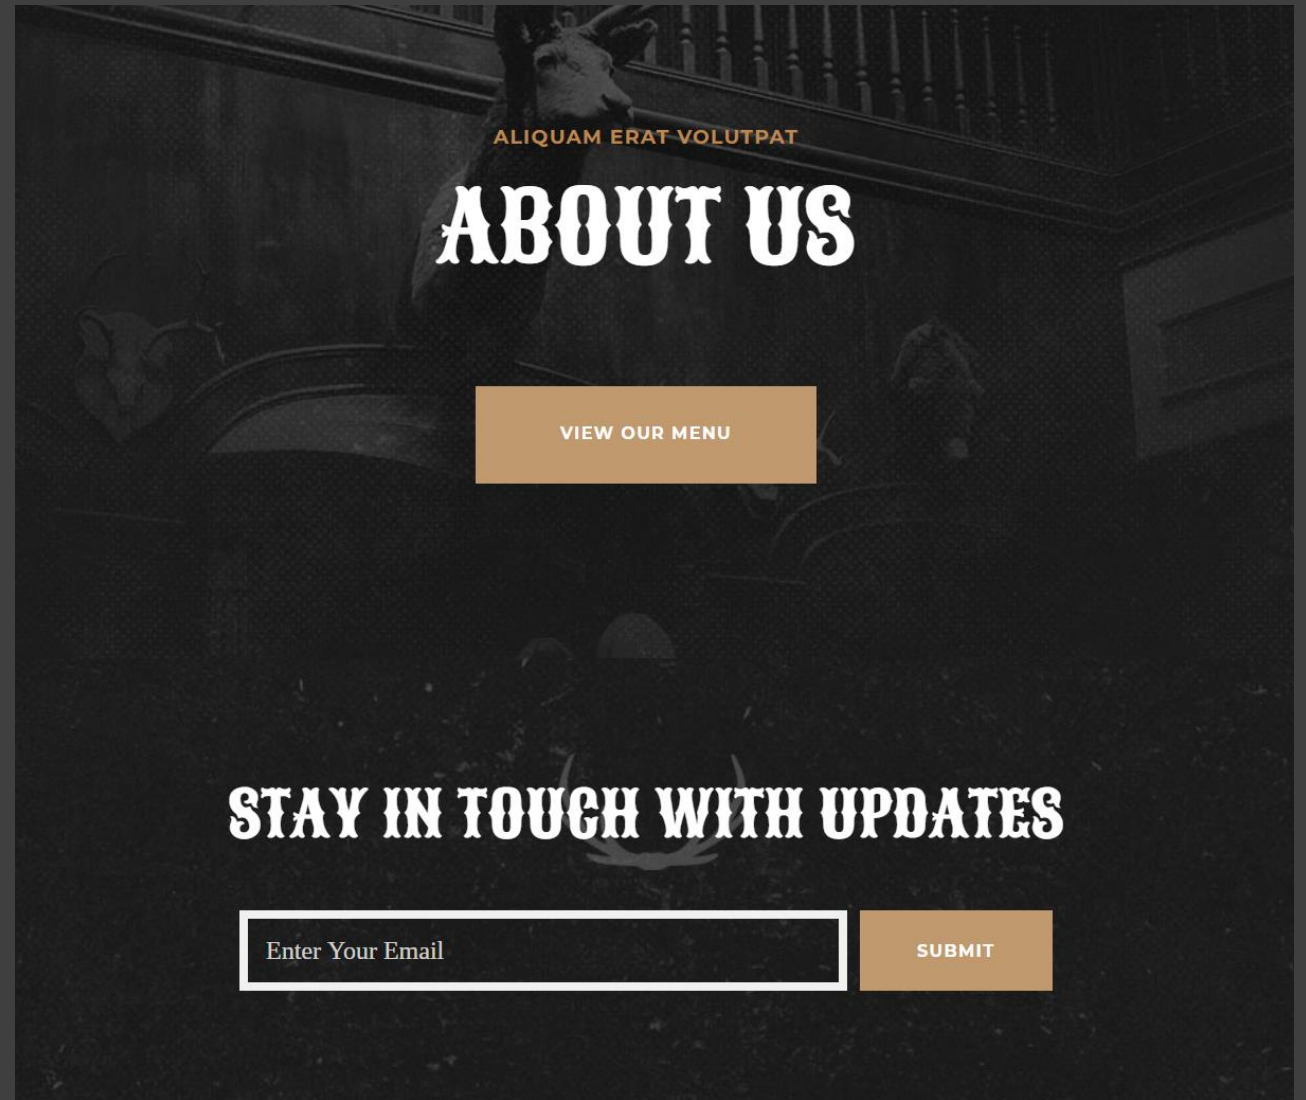

# ER-Diagram Page

Display the ER Diagram of the Database.

# About us Page

Display the information of our group and how to get connect with us.

# Relational Scheme of Database

Relational Scheme:

BAR [id, Bar, Street, City, State, Phone, Bar License, Open, Close]

Items [Item, Category, Manufacture]

DRINKER [id, Name, Street, City, State, Phone, SSN, DriverLicense]

Sells [ItemID, License, Item, Price]

BILL [BillID, Time, Date, SSN, License]

Transaction [TransactionID, License, BillID, ItemID]

Frequents [License, State, SSN]

Likes [SSN, Item]

Primary key

Foreign Key

That's all  
THANK YOU !
